

# Success Stories

# Virtual Drive: Document Manager

*Search, process and analysis of high-volume data in real time with the Mototech Group Big Data platform.*

## The Requirement

- Searches the content of client's documents.
- Improvement of user experience, reducing the time spent searching their scans.
- High availability of the solution.

## Why Virtual Drive?

- Virtual Drive was implemented in order to offer a high added value service to clients.

## Achieved Results

- Virtual Drive centralizes, contains and offers indexation and search services to each application of its clients.
- The clients execute searches on metadata and/or the content of scanned documents.
- The clients define their own types of documents, metadata and filters.

## The Business

Youcapsule is a portal that aims to leave messages and a life story of the owner for their beloved people as a "time capsule", which can only be opened by the recipient when the originator of the capsule wishes, generally in the future.

## The Problem

The main obstacle was to develop an App where a specific event can be configured to occur in the future, then the recipient can access that time capsule the moment the person who has sent it wishes it to be opened. An example; a Grandmother can leave a message to her newborn granddaughter the day she is married. The main difficulty was how to make that happen, as well as how to store digital information safely and that it can be available at the right time.

## The Solution

From an integrated procedural system with the extraction of information from the recipients and using appropriate encryption techniques and DevOps, the application was developed. It was a very unique and one-of-a-kind request presented to Mototech Group.

## Benefits

The Company, based on the implemented solution, which contains the correct architecture to allow for expected growth, is in the process of presenting the business plan to the VC's to expand it and use the marketing tools for its growth. The youcapsule site is executing as planned.
